**Nkosikho Dlangamandla** was born in Cofimvaba (i.e. Eastern Cape, South Africa) on the 15 March 1983 and matriculated at Hector Peterson S.S.S in year 2002 in wallacedene, Cape Town. Subsequently, he completed a Bachelor and a Master of Technology degrees in Chemical Engineering at Cape Peninsula University of Technology (CPUT), Cape Town, South Africa. , in December 2008.. His research is based on the development of numerous technologies related to energy production, having designed a High Temperature Polymer Electrolyte Membrane Fuel Cells (HT-PEMFC), and currently, reactor development for hyper-fermentable sugar extraction in 3<sup>rd</sup> generation biorefinery systems. Nkosikho has worked as a part time lecturer at the CPUT. Nkosikho is currently working in hand with Kraaifontein church outreach forum, in developing the community, mainly focusing on Maths and Science teaching for pupils in local schools.
