Nazli Goker is a research assistant of Industrial Engineering at Galatasaray University, Turkey. She holds BS, MS, and PhD degrees in Industrial Engineering from Galatasaray University. Her areas of interest include DEA-based models and multi-criteria decision making with special focus on performance management. She has co-authored articles that appeared in Applied Soft Computing, Kybernetes, Socio-Economic Planning Sciences, Soft Computing, Journal of Intelligent & Fuzzy Systems, Technologic and Economic Development of Economy, and Social Indicators Research.

Mehtap Dursun is an associate professor of Industrial Engineering at Galatasaray University, Turkey. She holds BS, MS, and PhD degrees in Industrial Engineering from Galatasaray University. Her areas of interest include quality function deployment, fuzzy optimization, and multi-criteria decision making with special focus on waste management, personnel selection, and supplier selection. She has coauthored articles that appeared in Expert Systems with Applications, Resources Conservation and Recycling, International Journal of Production Research, Applied Mathematical Modelling, Computers & Industrial Engineering, Soft Computing, Socio Economic Planning Sciences, Kybernetes, and Social Indicators Research.
